

张三

产品经理 · AI应用与开发者工具
13800000000 | hello@example.com | github.com/example

工作经历

微软 Microsoft

开发者体验团队 · 产品经理

2023.07 - 至今

- 产品规划**: 围绕企业知识检索与研发协作场景, 负责需求发现、路线图规划和版本交付; 访谈不同规模团队, 梳理权限管理、信息溯源与反馈闭环, 推动产品从试点走向常态化使用。围绕不同团队的知识来源、使用频率和协作流程梳理需求差异, 明确首个版本的核心任务与后续范围, 记录方案取舍及上线后的反馈。
- AI应用**: 设计检索增强问答、文档摘要与任务助手, 联合算法团队建立覆盖准确性、时延和可解释性的评测集; 结合真实反馈定位失败案例, 优化召回策略、提示词与引用展示。
- 交付协作**: 协调研发、设计和客户成功团队, 拆解版本目标与验收标准; 建立上线检查、问题分级和周度复盘机制, 沉淀需求模板、产品文档及使用培训材料。
- 企业推广**: 组织试点团队的上线培训与使用回访, 整理知识库接入、权限配置和管理员交接流程; 跟踪首次使用、持续使用与问题解决情况, 将常见疑问转化为帮助文档和产品改进任务, 支持新团队独立完成部署与日常维护。

苹果 Apple

服务产品团队 · 产品实习生

2022.09 - 2023.06

- 用户研究**: 分析新用户注册、首次体验与订阅流程中的行为, 结合访谈和可用性测试识别阻碍; 输出用户旅程、问题优先级和交互改进方案, 跟进设计评审与开发验收。
- 数据分析**: 搭建核心漏斗与留存看板, 拆分不同来源、设备和用户群的行为差异; 参与实验方案制定与效果复盘, 将数据结论转化为可执行的产品迭代建议。

个人项目

开源效率工具

个人开发 · TypeScript / Python

2024.01 - 至今

- 设计并实现个人信息整理工具, 支持任务记录、全文搜索、标签管理与自动归档; 提供命令行和网页入口, 方便用户在不同工作流中快速记录并查找信息。
- 增加批量导入、数据备份和插件接口, 编写快速上手文档与示例; 通过社区反馈修复边界问题, 完善自动化检查和版本发布流程。GitHub

城市数据观察

- 采集公开的交通、商圈与公共设施数据, 完成清洗、地理编码与指标定义; 制作交互地图和趋势报告, 探索通勤效率、商业分布与城市空间之间的关系。
- 为数据源建立更新记录和质量检查, 处理重复地址、缺失字段及口径差异; 将筛选条件、指标解释和数据下载加入报告, 使读者能复核结论, 并在数据更新后重复完成分析。

教育经历

浙江大学

信息管理与信息系统 · 本科

2019.09 - 2023.06

- 主修数据库、统计学、管理信息系统与人机交互; 参与校园创新项目, 负责用户调研、原型设计及数据分析。
- 组织跨专业小组完成信息服务设计课程项目, 建立访谈提纲、原型测试和结果整理方法; 负责项目汇报及交付文档, 说明方案取舍、验证过程与后续改进方向。

专业技能

产品规划 · 用户研究 · 数据分析 · SQL · Python · Figma · AI应用评测 · 英语工作沟通

- 工作方法**: 把需求背景、使用场景、验收标准与交付范围写入产品文档; 使用原型和可用性测试核对方案, 结合事件埋点、漏斗及留存分析判断上线后的实际变化。
- 工程协作**: 能够阅读接口文档与数据结构, 用SQL核对统计口径, 用Python处理样本与评测结果; 将模型错误、权限限制和异常流程整理为可复现的问题, 协助研发定位并验证修复。
- 评测与复盘**: 根据用户完成任务的过程整理测试样本, 对答案质量、来源可核查性和响应速度分别记录; 复盘时区分信息缺失、检索偏差与表达不清, 将具体案例补入评测集, 说明改进建议和后续验收方式。

Jack

Product Manager · AI Applications and Developer Tools

Experience

Microsoft

Developer Experience · Product Manager 2023.07 - Present

- Product strategy:** Owned discovery, roadmap planning, and delivery for enterprise knowledge retrieval and developer collaboration. Interviewed teams of different sizes, defined access controls and source attribution, and built feedback flows to move pilots into regular use.
- AI applications:** Designed retrieval-augmented question answering, document summaries, and task assistants. Partnered with researchers to evaluate accuracy, latency, and explainability; analyzed real failure cases to improve retrieval, prompts, and citation presentation.
- Delivery and collaboration:** Aligned engineering, design, and customer success on release goals and acceptance criteria. Established launch checklists, issue prioritization, and weekly reviews; maintained product documentation, discovery templates, and training materials.
- Enterprise rollout:** Trained pilot teams and documented knowledge-source setup, permissions, and administrator handover. Tracked adoption and support issues, turning recurring questions into documentation and product tasks so new teams could operate independently.

Apple

Services · Product Intern 2022.09 - 2023.06

- User research:** Studied registration, onboarding, and subscription flows through behavioral analysis, interviews, and usability tests. Produced journey maps, prioritized friction points, proposed interaction improvements, and supported design reviews and acceptance testing.
- Data analysis:** Built funnel and retention dashboards, segmented behavior by acquisition source, device, and user group, and contributed to experiment design. Turned analysis and post-launch findings into actionable iteration proposals for the product team.

Projects

Open Productivity Toolkit

Independent Developer · TypeScript / Python 2024.01 - Present

- Built a personal information organizer with task tracking, full-text search, tags, and automatic archiving. Provided CLI and web interfaces so users could record and retrieve information across different workflows.
- Added bulk imports, backups, and plugin APIs; maintained setup guides, example projects, automated checks, and release workflows. Used community feedback to resolve edge cases and improve reliability. GitHub

Urban Data Explorer

- Collected public transport, business district, and facility data; cleaned records, geocoded locations, and defined comparable indicators. Built interactive maps and trend reports to investigate commuting efficiency, commercial distribution, and urban spatial patterns.
- Added update logs and quality checks for duplicate addresses, missing fields, and inconsistent definitions. Included filters, metric explanations, and downloads so readers could verify findings and repeat analyses after data updates.

Education

Zhejiang University

B.Sc. in Information Management and Information Systems 2019.09 - 2023.06

- Coursework: databases, statistics, management information systems, and human-computer interaction. Conducted user research, prototyping, and data analysis for a campus innovation project.
- Coordinated an interdisciplinary service-design project, documenting interviews, prototype tests, tradeoffs, validation findings, and next steps for the final presentation and handover.

Skills

Product Strategy · User Research · Data Analysis · SQL · Python · Figma · AI Evaluation · Professional English

- Product methods:** Document use cases and acceptance criteria; validate prototypes through usability tests and assess releases with funnel and retention analysis.
- Engineering collaboration:** Read API and data specifications, verify metrics with SQL, and process evaluation samples with Python. Reproduce model, permission, and workflow errors and validate fixes.
- Evaluation and reviews:** Record task-based samples, answer quality, source verification, and latency. Separate missing information, retrieval errors, and unclear responses; add cases to evaluations and define follow-up acceptance checks.
